

SFP-30TP

1.25Gbps Ethernet Copper SFP (Small Form-factor Pluggable) Transceiver without DMI

Features

- Data Rate 1.25Gbps
- Compact RJ-45 connector assembly
- Comply with IEEE 802.3ab
- Comply with MSA (SFP Multisource Agreement)
- Hot-pluggable SFP footprint
- Commercial temperature (0°C~70°C)
- Fully metallic enclosure for low EMI
- Low power dissipation (1.05W typical)

Description

Connection Technology Systems SFP-30TP transceiver is high performance, cost-effective module compliant with Gigabit Ethernet standard specified in IEEE 802.3ab which supports 1000Mbps data rate up to 100 meters over unshielded twisted-pair category 5 cable.

SFP-30TP also provides standard serial ID information compliant with SFP Multisource Agreement (MSA) and with the hot-pluggable function, SFP-30TP offers flexible and easy way to be installed into SFP MSA compliant ports at any time without the interruption of host equipment in use.

CTS SFP-30TP Copper SFP transceiver can be used with CTS Switches and Converters that support RJ-45 connectors.

Order Information

SFP-30TP

Model	TP Port			
	Speed	Connector	Distance	Temperature
SFP-30TP	1000Mbps	RJ-45	100M	0 ~ 70°C
