

Description

Connection Technology Systems (CTS) ESW-5112-2MG is a layer 2 managed Ethernet switch equipped with 8 ports of 10/100/1000Base-T RJ-45, 2 ports of 100M/1G/2.5G/5G/10GBase-T (compliant with NBase-T standard), and 2 ports of 1/10GBase-R SFP+. The SFP+ slots can accommodate a wide range of SFP/SFP+ transceivers including single-mode, multi-mode, and WDM.

As bandwidth demand soars to new heights, 2 x 100M/1G/2.5G/5G/10GBase-T ports allow users to get up to the speed of 2.5/5Gbps. The multi-speed interfaces hence facilitate various network settings and applications, pushing through the bottleneck of 1Gbps with the same, predominant UTP Cat 5e/6 cables in the most cost-effective approach possible.

The fanless design reduces dust accumulation and power consumption, delivering zero-noise operation. Plus, ESW-5112-2MG is 8.5 inches in width, altogether making it the best solution for network infrastructure often hindered by scarce installation space.

In support of optional AC, DC, and external DC power for different installation and application environments, ESW-5112-2MG has rich functions for SMBs and enterprises that plan to deploy Ethernet services, along with the capability of versatile integration into the existing network infrastructure.

For the VLAN functionality, VLAN Translation allows service providers to implement metro Ethernet services by translating the original VLAN ID to a new VLAN ID with different priorities for different customers, whereas Selective Q-in-Q enables operators to differentiate various types of users (home/enterprise) and service levels by encapsulating VLAN tags.

With multicast networking, the model supports IGMP snooping, IGMP fast leave, IGMP filtering, and MVR (Multicast VLAN Registration) to intelligently transmit multicast traffic and deliver the IPTV service.

Besides the CTS' unique Fast Redundancy (Fast Ring v2 / Chain protocols) that prompts better topology stability, ESW-5112-2MG also comes with intelligent diagnostics which deliver real-time SFP/SFP+ and CPU temperature/utilization monitoring and therefore identify possible link/system failures in advance. It simplifies network maintenance and improves connection reliability.

ESW-5112-2MG can be easily operated with a web GUI, console, telnet CLI, and SNMP, optimizing the management experience.

Features

■ 2 x 100M/1G/2.5G/5G/10GBase-T Multi-G Ports

As bandwidth demand soars to new heights, 2 x 100M/1G/2.5G/5G/10GBase-T ports allow users to get up to the speed of 2.5/5Gbps. The multi-speed interfaces hence facilitate various network settings and applications, pushing through the bottleneck of 1Gbps with the same, predominant UTP Cat 5e/6 cables in the most cost-effective approach possible.

■ Fanless, Small-Form-Factor Design

The fanless design reduces dust accumulation and power consumption, delivering zero-noise operation. Plus, ESW-5112-2MG is 8.5 inches in width, altogether making it the best solution for network infrastructure often hindered by scarce installation space.

■ VLAN Functionality

VLAN Translation allows service providers to implement metro Ethernet services by translating the original VLAN ID to a new VLAN ID with different priorities for different customers, whereas Selective Q-in-Q enables operators to differentiate various types of users (home/enterprise) and service levels by encapsulating VLAN tags.

■ IPv4/IPv6 Dual Stack

Support IPv6 management, packet forwarding, and MLD v1/v2 snooping.

■ Intelligent Diagnostics

Greatly help network operators to monitor current CPU/memory utilization, power input voltage, system voltage, CPU temperature, and whether SFP/SFP+ transceiver parameter (e.g. temperature) is beyond or below the threshold.

■ IEEE 802.3ad Link Aggregation

A cost-efficient way to increase bandwidth and reliability by grouping multiple links into one.

■ Multicast Networking

Support IGMP snooping, IGMP fast leave, IGMP filtering, and MVR (Multicast VLAN Registration) to intelligently transmit multicast traffic and deliver IPTV service.
